EDUCATION

Dayananda Sagar College of Engineering
B.E in Computer Science and Engineering

CGPA: 8.38
2024 - 2027

TECHNICAL SKILLS

Languages: C++, Python
Frontend: React.js, JavaScript, HTML, CSS
Backend: FastAPI, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, Docker, Jenkins, Excel
Concepts: Data Structures, OOPS, Authentication, DBMS
Cloud & Deployment: Vercel, Render, MongoDB Atlas

PROJECTS

Noq– Hospital Management System – GitHub

Tech Stack: React, FastAPI, MongoDB Atlas, JWT, Vercel, Render

- Developed a **multi-tenant hospital platform** to digitize appointments and reduce patient waiting time through smart queue handling.
- Established role-based workflows for **System Admin, Hospital Manager, Doctor, and Patient** with secure hospital-level data isolation.
- Implemented REST APIs using **FastAPI and MongoDB Atlas** to support appointments, token generation, billing, and user workflows.
- Deployed the application using Vercel, Render, and MongoDB Atlas with configured environment variables.

TraceAcc – Graph-Based Anti-Money Laundering Detection Platform – GitHub

- Built a fraud detection system that analyzes financial transaction networks to identify suspicious money laundering patterns.
- Converted transaction records into directed graphs and applied algorithms to detect cycles, fan-in/fan-out, burst activity, and layered transactions.
- Applied graph analytics and anomaly detection techniques to identify high-risk transaction entities.
- Designed an interactive React dashboard using Cytoscape.js for visual investigation of transaction relationships.

Cutslot– Elite Salon Management System with DevOps Pipeline – GitHub

Tech Stack: React, JWT, FastAPI, SQLite, Jenkins, Docker, Kubernetes.

- Developed a premium salon booking application focused on enhancing customer experience and simplifying service operations.
- Crafted a luxury UI/UX interface with dedicated dashboards for clients, workers, and administrators.
- Implemented an end-to-end booking workflow including service selection, worker allocation, and reviews.
- Deployed the system using Docker, Kubernetes, and Jenkins CI/CD pipeline.

Book-Swap – Android Application – GitHub

Tech: XML, SQLite, JWT Authentication, Java

- Developed a peer-to-peer Android application for exchanging books among college students.
- Implemented JWT authentication and CRUD book listings using SQLite.
- Designed responsive XML-based interfaces for user profiles, catalogs, and exchange requests.

Achievements & Hackathons

- Top 5, DSA Hackathon – BMSCE**
- Participated in **4+ hackathons**, including **RIFT National 2026**, conducted by PW
- Participant – **Point Blank CTF (Cybersecurity Competition)**

Bengaluru, India
